office chairs

Ergonomic office chairs are perfect for people who spend 8 hours or more a day in front of a computer, because human bodies are not meant to sit for long periods of hours in one position especially when they are on poorly designed desk chairs. Modern jobs have changed patterns of people's work styles that require more hours on their desks. Schairs has come a long way of studying human movements at work places, researching scientific methods, developing new parts, testing, and manufacturing chairs that could fit perfect for those in need of a good desk chair. Schairs ergonomically correct chairs have evolved to the point where our new concepts of desk chairs consider one's body weight, height, gender and more. Each of individual parts is well-designed and ergonomically adjustable to all body types and support better movements for wider range of work. They will make sitting experience a pleasant and painless one.

Role

Precedent sense of novelty seek-out office chairs with refined lines to direct modern atmosphere always stand out anywhere in the world. As well, it can harmonize a smooth design you feel from the curve of the back seat plate which provides integrity with the curve of the body, enabling numerous convenient functions in a single chair so that it can help you resist tiredness and keep you feeling comfortable even after sitting for a long time.

Tone

With the lumbar supporting mechanism engrafted onto the all-in-one body frame, the Tone series is a chair for human designed to dynamically respond to the user, as the body frame pushes the lumbar support of the back plate for more thorough contact with the hips and waist when tilted, which makes the waist closely contacted with the chair again. It applies an exquisite technological principle between the human body and the locking system to the design.

Zenith II

With features such as beautiful lines, a slim body and an ergonomic design, the Zenith II series is a humanity office chair that adapts to the way body types can change over time. It combines a butterfly-shaped lumbar-supporting system with a locking system to make the hips and waist close without a gap, strongly supporting them and more smoothly absorbing the dynamic movement of the body to add comfort.

Menches

Menches Series are manufactured with our Schairs' s special lumbar support system developed from studying human ergonomic science and locking mechanism. When Menches chair is tilted, its special force would flex and lift a part of backrest with dynamic lumbar support that molds around sitter' s spine for comfortable and better sitting postures.

executive chairs

High quality, finest natural leather executive office chairs are specially designed for highly positioned executive officers to provide comforts and grace with best structures in the industry. Elegantly made leather seat automatically remembers and molds around unique shape of user's spine.

It will give a very pleasant office experience of lifetime.

Our executive office chairs combined with ergonomic science & functional system can provide best seating postures and painless comfort with soft volume cushions that absorb weight, created by world's finest engineers, designers, and ergonomists in our company, these chairs can offer truly one of a kind experience.

Hera

If your movements could be absorbed naturally into the chair while seated...
Without any separate electronic settings, the Hera series offers the highest level of comfort, through a simple rather than a specialized mechanism. The series supports delicate human movements because it is designed in an all-in-one body style and optimizes the fit through a sophisticated European style design.

Titan

The Titan series for CEO's helps you to feel comfortable while seated because it touches the body line softly, like a gentle embrace, and offers proper fitting. In addition, the steel armrests, which are finished with the same material pads as the back and hip plates, create a two-toned, modern look through a balance between the two materials, leather and steel, as well as a soft feeling.

Kaiser

This is a practical chair for director level officers, and has a simple design with a feeling of class and comfort. Its volume, and wide and cool back seat plate can provide the best ease, and the back seat plate can be provided with various volume lines to add a feeling of flexible cushioning. In addition, it can be an even more elegant business chair thanks to its smooth surface texture which feels it adheres to the body.

Chairman

Our Chariman Series represents top of the line, heavy duty chairs for CEOs and executive officers. Made with unique, one of a kind steel frame with best man-made soft leather and specially structured armrest, every chair is crafted and assembled by hand to guarantee life time durability, all goods without sacrificing comfort, quality, and style.

Synchro Mechanism

3:1 Back vs Seat panel ratio, built-in Synchro Mechanism inclines to the best conditions closer than supporting sitter's movements for less tension on the back and more comfort.

Back Cushion

Cushion reduces fatigue and protect your back for long hours of sitting. (Removable)

seminar tables

Seminars, education sessions and meetings occur frequently, vary significantly in terms of number of people and size, and require different spatial configurations depending on the event. For this reason, efficient and effective deployment can be difficult. Schairs dedicated seminar table is an economical table that is excellent in terms of flexibility of layout, ease of expansion and reduction, and loadable function.

Seminar Table

The seminar table, with clearly modern sensibilities, can be expanded in a wide range depending on the size of the space, making it convenient for any place where many people gather for meetings or education, such as seminar rooms, auditoriums, and education rooms. As well, by attaching a board on the bottom of the upper plate of the table you can create a storage space for materials or books, maximizing the available space for your workstation.

* W and D sizes are on top.
